

Placement Simulator - Readiness Report

Readiness Score: 59/100

Status: Needs More Practice

Category Comparison

Core CS: 45/100 (Needs Improvement)

DSA: 70/100 (Good)

HR / Behavioral: 55/100 (Needs Improvement)

Strengths Across All Interviews

- Accurate implementation of balanced parentheses algorithm
- Clear explanation of OS processes and threads
- Confident delivery on the first question
- Good communication in DSA
- Demonstrated learning mindset and daily practice

Weaknesses Across All Interviews

- Incorrect explanation of SQL INNER JOIN vs LEFT JOIN
- No answer for web page loading question (networking gap)
- Lack of problem solving and debugging discussion in Core CS
- Zero coding score in Core CS
- Zero problem solving and coding scores in HR/Behavioral
- Incomplete explanations for cycle detection and first non repeating character in DSA
- Low confidence and minimal elaboration in HR responses

Most Consistent Skills

- Clear conceptual explanations
- Confidence in delivery
- Coding proficiency in DSA
- Effective communication during DSA questions

Skills Requiring Improvement

- Core CS coding
- Core CS problem solving
- Networking fundamentals
- SQL join semantics
- HR confidence and problem solving
- Depth of reasoning in DSA

Improvement Priority

- Core CS coding and problem solving first
- HR confidence and problem solving next
- DSA depth and advanced reasoning

Placement Prediction

Estimated Technical Interview Success: Moderate

Estimated HR Interview Success: Moderate

Recommended: Startup, Internship Ready

AI Career Readiness Summary

Electrical engineering student with solid DSA coding skills and clear conceptual explanations, but needs to strengthen Core Computer Science concepts, coding ability, and interview confidence.

Final Recommendation

Not placement ready; focus on Core CS coding/problem solving and interview confidence before applying.
