

Placement Simulator - Readiness Report

Readiness Score: 65/100

Status: Needs More Practice

Category Comparison

System Design: 50/100 (Needs Improvement)

Web Development: 46/100 (Needs Improvement)

Core CS: 50/100 (Needs Improvement)

DSA: 90/100 (Excellent)

Strengths Across All Interviews

- Exceptional Data Structures & Algorithms skills (technical, communication, confidence, problem solving, coding)
- Strong communication across all categories

Weaknesses Across All Interviews

- Limited technical depth in Web Development
- Low confidence and missing coding in System Design
- Incomplete core CS concepts (OOP, JOIN use cases, request flow)
- Inadequate architecture detail and trade off analysis in System Design

Most Consistent Skills

- Communication

Skills Requiring Improvement

- System Design architecture depth, coding, and confidence
- Web Development technical depth and confidence
- Core CS OOP concepts and problem solving detail

Improvement Priority

- System Design
- Web Development
- Core CS

Placement Prediction

Estimated Technical Interview Success: Moderate

Estimated HR Interview Success: Moderate

Recommended: Startup, Internship Ready

AI Career Readiness Summary

The candidate excels in data structures and algorithms, communicating ideas clearly and confidently, but needs to strengthen system design architecture, web development technical depth, and core computer science fundamentals.

Final Recommendation

The candidate is not yet placement ready; focused improvement on system design and web development technical depth will most improve placement readiness.
