- Clear communication in DSA and Core CS explanations
- Accurate explanations of SQL joins and OS concepts

Weaknesses Across All Interviews

- Low confidence across categories
- Lack of depth and trade off analysis in System Design
- Incomplete coverage of OOP concepts
- Generic HR examples with minimal detail
- No coding answers
- Limited demonstration of problem solving in Core CS and HR

Most Consistent Skills

- Technical explanations
- Communication clarity
- Problem solving in DSA

Skills Requiring Improvement

- System Design fundamentals and trade off analysis
- Coding practice
- Confidence building
- OOP concepts depth
- Specific, metric driven HR examples

Improvement Priority

- System Design fundamentals and trade off analysis
- Coding practice
- Confidence building across all categories
- OOP concepts depth
- HR example specificity

Placement Prediction

Estimated Technical Interview Success: Moderate

Estimated HR Interview Success: Moderate

Recommended: Startup, Internship Ready

AI Career Readiness Summary

Candidate shows strong DSA knowledge and clear communication but lacks depth, confidence, and coding experience, especially in system design and HR scenarios, requiring focused improvement to reach placement readiness.

Final Recommendation

Prioritize System Design fundamentals, coding practice, and confidence building; with targeted effort in these areas the candidate can achieve placement readiness.
