

Placement Simulator - Interview Report

Role: SDE
Category: dsa
Difficulty: medium

Scores

overall: 75/100
technical: 80/100
communication: 65/100
confidence: 70/100
problemSolving: 80/100
coding: 85/100

Strengths

- Good understanding of graph theory and bipartite graphs
- Correct implementation of bipartite graph check using BFS
- Good understanding of dynamic programming and its application to the coin change problem
- Correct implementation of the coin change problem using dynamic programming

Weaknesses

- Poor performance on the first two questions, indicating a lack of preparation or understanding of the topics
- Difficulty in communicating complex ideas clearly and concisely
- Lack of confidence in answering certain questions

Suggestions

- Improve preparation on data structures and algorithms, particularly on graph theory and dynamic programming
- Work on communicating complex ideas clearly and concisely
- Practice answering questions with confidence and decisiveness

Summary

The candidate demonstrated a good understanding of certain topics, such as graph theory and dynamic programming, but struggled with others, such as data structures and algorithms. They also had difficulty communicating complex ideas clearly and concisely. With improvement in preparation and communication skills, the candidate has the potential to perform well in a placement interview.
