

# Placement Simulator - Interview Report

Role: SDE  
Category: core-cs  
Difficulty: easy

## Scores

overall: 35/100  
technical: 30/100  
communication: 50/100  
confidence: 30/100  
problemSolving: 20/100  
coding: 0/100

## Strengths

- Attempted to answer all questions
- Recognized the role of a primary key in a database

## Weaknesses

- Incorrect and incomplete explanations of core concepts
- Missing critical steps in networking and OOP
- Low confidence and vague language
- Lack of depth and reasoning

## Suggestions

- Review fundamentals of HTTP, DNS, and browser rendering pipelines
- Study OOP principles with concrete examples and practice explaining them
- Practice articulating answers clearly and confidently
- Use structured responses (e.g., bullet points, diagrams) to improve communication

## Summary

The candidate provided surface-level answers with several misconceptions across networking, OOP, and database concepts. While they attempted to respond to each question, the explanations were often vague, incomplete, and technically inaccurate. Communication was moderately clear but lacked structure and confidence. Overall performance indicates a need for foundational study and practice in core computer science topics.
