

Placement Simulator - Interview Report

Role: SDE

Category: dsa

Difficulty: easy

Scores

overall: 78/100

technical: 80/100

communication: 72/100

confidence: 85/100

problemSolving: 80/100

coding: 70/100

Strengths

- Correct use of appropriate data structures and algorithms
- Consistent confidence in answers
- Ability to write functional code for the string problem

Weaknesses

- Lack of detailed explanation and reasoning
- Missing complexity analysis
- Minor code typo and lack of edge case handling

Suggestions

- Provide thorough explanations including time/space complexity
- Discuss edge cases and robustness in each solution
- Proofread code for typos and completeness before submission

Summary

The candidate demonstrates solid technical knowledge with correct algorithmic choices for all three problems, but their explanations lack depth and they omitted complexity analysis and edge case considerations. Their coding example is functional but contains a minor typo. Overall, the candidate shows good potential with room for improvement in communication detail and code polish.
