

Placement Simulator - Interview Report

Role: SDE
Category: hr
Difficulty: easy

Scores

overall: 55/100
technical: 55/100
communication: 65/100
confidence: 55/100
problemSolving: 0/100
coding: 0/100

Strengths

- Demonstrates a learning mindset and willingness to improve
- Balances electrical engineering coursework with basic programming
- Engages in daily practice of data structures and algorithms

Weaknesses

- Limited depth in technical knowledge and lack of concrete examples
- Low confidence and minimal elaboration in responses
- No evidence of problem solving or coding skills
- Sparse motivation explanation and lack of structured answers

Suggestions

- Provide specific project or coursework examples that showcase applied skills
- Use the STAR format for behavioral questions to structure responses
- Practice advanced data structure and algorithm problems to build depth
- Seek mock interviews to improve confidence and delivery

Summary

The candidate shows a willingness to learn and a focus on improving core CS fundamentals, but lacks depth in technical knowledge, concrete examples, and problem solving experience. Confidence and communication are moderate, yet the interview would benefit from more structured answers and evidence of applied skills.
