

Placement Simulator - Interview Report

Role: SDE
Category: core-cs
Difficulty: easy

Scores

overall: 45/100
technical: 45/100
communication: 45/100
confidence: 70/100
problemSolving: 30/100
coding: 0/100

Strengths

- Clear and accurate description of processes and threads, demonstrating solid foundational knowledge.
- Confident delivery on the first question, indicating comfort with basic OS concepts.

Weaknesses

- Incorrect explanation of INNER JOIN vs LEFT JOIN, showing a misunderstanding of SQL join semantics.
- No answer provided for the web page loading question, indicating a gap in networking knowledge.
- Lack of problem solving or debugging discussion throughout the interview.

Suggestions

- Review SQL join types and practice articulating their differences with examples.
- Study the end to end flow of HTTP requests, DNS resolution, TCP handshake, and browser rendering to answer web related questions.
- Work on structured problem solving approaches, such as breaking down questions into sub steps and explaining trade offs.

Summary

The candidate shows strong foundational knowledge of OS concepts but struggles with SQL joins and lacks depth in networking topics. Confidence is high when answering familiar material, but the interview reveals significant gaps in breadth and problem solving skills.
