

Placement Simulator - Interview Report

Role: SDE
Category: web-dev
Difficulty: easy

Scores

overall: 45/100
technical: 55/100
communication: 55/100
confidence: 70/100
problemSolving: 40/100
coding: 0/100

Strengths

- Demonstrated clear understanding of semantic HTML and its benefits for accessibility and maintainability.

Weaknesses

- Did not answer the event bubbling and delegation question.
- Provided an incorrect explanation of the CSS box model and border-box.
- No evidence of problem solving or debugging skills.

Suggestions

- Review event bubbling and delegation with practical examples.
- Study the CSS box model, especially the difference between content-box and border-box.
- Practice explaining concepts concisely and accurately.
- Engage in coding exercises that require debugging and problem decomposition.

Summary

The candidate shows strong knowledge of semantic HTML but lacks understanding of event handling and CSS box model. Confidence is high when answering known topics, but overall technical depth is limited. Focus on foundational web concepts and problem solving will improve readiness for an SDE role.
