

Placement Simulator - Interview Report

Role: SDE

Category: system-design

Difficulty: easy

Scores

overall: 60/100

technical: 61/100

communication: 83/100

confidence: 88/100

problemSolving: 70/100

coding: 0/100

Strengths

- Clear explanation of load balancer role and common algorithms
- Comprehensive coverage of caching layers and suitable data
- High confidence and decisive tone

Weaknesses

- Incorrect claim about database choice for banking ledger
- Missing depth and reasoning in database comparison
- Limited discussion of trade offs and use case suitability

Suggestions

- Study relational vs document database trade offs, especially ACID vs scalability
- Practice articulating pros/cons for each database type with concrete examples
- Include more reasoning steps when choosing technology to demonstrate problem solving

Summary

The candidate demonstrates solid communication and confidence, especially in explaining load balancers and caching strategies. However, a critical misunderstanding about database selection for a banking ledger indicates a significant technical gap. Overall performance is average, with room for improvement in database trade off analysis and deeper technical reasoning.
