

Placement Simulator - Interview Report

Role: SDE
Category: hr
Difficulty: easy

Scores

overall: 75/100
technical: 70/100
communication: 80/100
confidence: 85/100
problemSolving: 70/100
coding: 0/100

Strengths

- Strong DSA proficiency and consistent practice
- Clear articulation of learning goals and career aspirations
- Demonstrated problem solving mindset through debugging experience

Weaknesses

- Limited practical development experience beyond core CS subjects
- Lack of depth in system design and web development concepts
- Answers are somewhat generic with few concrete project details

Suggestions

- Provide specific examples of projects, including architecture choices and trade offs
- Engage in end to end development exercises to build practical web dev skills
- Practice coding interview questions to strengthen coding confidence and depth

Summary

The candidate exhibits solid DSA knowledge and a clear learning trajectory, but lacks depth in practical development and system design. Communication is concise and generally clear, with high confidence. Strengthening concrete project examples and coding practice would elevate overall performance.
