

Placement Simulator - Interview Report

Role: SDE
Category: web-dev
Difficulty: easy

Scores

overall: 35/100
technical: 45/100
communication: 30/100
confidence: 35/100
problemSolving: 20/100
coding: 0/100

Strengths

- Correctly identified that var is function-scoped while let and const are block-scoped, and noted that let can be reassigned whereas const cannot.

Weaknesses

- No knowledge of event bubbling and delegation.
- No knowledge of semantic HTML.
- Incomplete answers to key questions.
- Low confidence in responses.

Suggestions

- Study event bubbling and delegation with practical examples.
- Learn semantic HTML and its impact on accessibility and maintainability.
- Practice explaining concepts in a structured, concise manner.
- Build small projects to reinforce understanding and boost confidence.

Summary

The candidate demonstrated a basic grasp of variable declaration scopes in JavaScript but lacked knowledge on event bubbling, delegation, and semantic HTML. Communication was brief and sometimes uncertain, and overall confidence was low. Focused study and practice on missing topics and clearer explanations are recommended.
