

Placement Simulator - Interview Report

Role: SDE
Category: web-dev
Difficulty: easy

Scores

overall: 30/100
technical: 35/100
communication: 35/100
confidence: 25/100
problemSolving: 0/100
coding: 0/100

Strengths

- Partial understanding of JavaScript variable declarations and scope

Weaknesses

- No knowledge of React props and state
- No knowledge of semantic HTML
- Low confidence and incomplete answers
- No problem solving or coding demonstrated

Suggestions

- Study React fundamentals, especially props and state
- Learn semantic HTML and its benefits for accessibility and maintainability
- Practice explaining concepts clearly and confidently
- Engage in coding exercises to improve problem solving skills

Summary

The candidate answered only one of three questions, providing a partially correct explanation of JavaScript variable declarations. They lacked knowledge on React props/state and semantic HTML, answered with low confidence, and did not demonstrate problem solving or coding skills. Focus should be on foundational concepts, clear communication, and confidence building.
