

Placement Simulator - Interview Report

Role: SDE
Category: core-cs
Difficulty: easy

Scores

overall: 50/100
technical: 45/100
communication: 65/100
confidence: 47/100
problemSolving: 30/100
coding: 0/100

Strengths

- Clear and correct explanation of INNER JOIN vs LEFT JOIN
- Accurate description of encapsulation with a concrete example

Weaknesses

- Incomplete answers: missing use cases for JOINS
- Omitted key OOP concepts (polymorphism, abstraction)
- No response to web request flow question
- Limited depth and reasoning in answers

Suggestions

- Review all OOP concepts and practice giving full examples
- Study the end-to-end HTTP request/response cycle and rehearse explaining it
- Work on structuring answers to cover all requested points
- Build confidence by practicing mock interview questions

Summary

The candidate demonstrated solid understanding of basic SQL joins and encapsulation, but struggled to cover all requested concepts and lacked depth in explanations. Missing key OOP concepts and inability to answer the web request flow question indicate gaps in knowledge and communication. Overall performance is weak, with room for improvement in technical breadth, problem solving reasoning, and confidence.
