

Placement Simulator - Interview Report

Role: SDE
Category: web-dev
Difficulty: medium

Scores

overall: 46/100
technical: 30/100
communication: 80/100
confidence: 37/100
problemSolving: 40/100
coding: 0/100

Strengths

- Clear and concise communication in the middleware question
- Honesty about knowledge gaps
- Structured explanation of middleware order

Weaknesses

- Lack of technical depth on useEffect and security concepts
- Incorrect or missing answers to key questions
- Low confidence and decisiveness
- Limited problem solving detail

Suggestions

- Review core React hooks, especially useEffect dependencies and common pitfalls
- Study web security fundamentals: XSS, CSRF, and injection prevention
- Practice articulating solutions with confidence and detail
- Work on decomposing problems and explaining trade offs

Summary

The candidate communicated clearly and admitted knowledge gaps, but their technical answers were incomplete or incorrect, especially on React hooks and web security. Confidence was low, and problem solving detail was minimal. Overall performance is weak, requiring focused study and practice to reach placement level.
