

Placement Simulator - Interview Report

Role: SDE

Category: system-design

Difficulty: medium

Scores

overall: 35/100

technical: 35/100

communication: 45/100

confidence: 20/100

problemSolving: 30/100

coding: 0/100

Strengths

- Mentioned relevant technologies such as Elasticsearch and message queues

Weaknesses

- Failed to answer the first question
- Answers lacked depth and omitted critical concepts
- No trade off analysis or detailed design steps
- Low confidence and vague language

Suggestions

- Practice structuring answers with problem decomposition, trade offs, and detailed design steps
- Prepare to discuss scalability, consistency, and failure handling in depth
- Use concrete examples and metrics to demonstrate understanding
- Work on speaking more confidently and decisively

Summary

The candidate struggled to provide detailed, technically sound answers. While they referenced some relevant technologies, their responses lacked depth, trade off analysis, and confidence. Improvement is needed in structuring solutions, explaining design decisions, and communicating more decisively.
