

UG Year:2027 SGSITS, Indore  
D.O.B:21/02/2004  
Email ID : bhardwajsorabh2004@gmail.com

Enrollment No.:0801CS231136  
Department - CSE  
Gender : Male  
Mobil:9302599518

| Degree / Certificate | University / Board | Institute / School  | Year of Passing | CGPA / Percentage |
|----------------------|--------------------|---------------------|-----------------|-------------------|
| Graduation           | RGPV, Bhopal       | SGSITS, Indore      | 2027            | 7.905             |
| 12th                 | CBSE               | Holy Trinity School | 2022            | 88.6%             |
| 10th                 | CBSE               | Holy Trinity School | 2020            | 88.6%             |

#### Scholastic Achievements

- JEE Mains Qualified with All India Rank (AIR): 34,855
- Solved 350+ Data Structures and Algorithms (DSA) problems on LeetCode
- Goldman Sachs Engineering Virtual Hiring Challenge (Hackathon) – 2024 Secured All India Rank: 749

#### Projects

- CodeRank**  
Developed a full-stack competitive programming analytics platform using HTML, CSS, JavaScript, Node.js, Express.js, and MongoDB that allows users to enter their LeetCode and CodeChef usernames to automatically fetch, analyze, and display problem-solving data. Built RESTful APIs to process platform-wise statistics and designed an interactive dashboard showing total problems solved, daily activity, and performance insights. Implemented a leaderboard system to rank users based on competitive metrics and introduced challenge-based competitions (such as daily problem-solving goals) to encourage consistent practice. Followed MVC architecture, optimized database queries using MongoDB schemas, and ensured scalable, maintainable backend design suitable for production-level applications.

#### Automatic Music Genre Classification

Developed a machine learning-based music genre classification system that predicts the genre of a song when a user uploads an audio file. Implemented audio feature extraction techniques to analyze characteristics such as frequency and temporal patterns, and trained supervised machine learning models to classify songs into predefined genres

#### Platforms Worked

- Operating Systems : Windows, Linux
- Programming Skills : C, C++, Java, Python, SQL, OOPs, MongoDB
- Web Designing : HTML, CSS, JavaScript, Node.js, Express
- Software Skills : HTML, CSS, JavaScript, Node.js, Express, MongoDB

**Core**

- Data Structures and Algorithms
- Computer Architecture
- Object Oriented programming
- Mobile App Development
- Agile Methodologies

**Breadth**

- Economics for Engineers
- Digital Communication
- Microprocessor & Microcontroller
- Engineering Mathematics
- Discrete Structures

**Positions of Responsibility**

---

- **Contributor – Tech Communities (Online/Offline)**  
Actively participate in coding challenges and discussions on platforms like LeetCode, GeeksforGeeks, and GitHub.
- **Self-Learner & Mentor (Informal)**  
Helped peers understand DSA concepts and LeetCode problems during group study sessions.

**Extracurricular Activities**

---

- Represented school in inter-school sports competitions and participated in inter-branch tournaments during college.
- Actively participated in coding contests and hackathons organized by the college, enhancing problem-solving and teamwork skills.
- Enthusiastic contributor to both technical and non-technical events, maintaining a balance between academics and co-curricular activities.
