Placement Simulator - Interview Report

Role: SDE
Category: dsa
Difficulty: medium

Scores

overall: 84/100
technical: 85/100
communication: 80/100
confidence: 90/100
problemSolving: 80/100
coding: 85/100

Strengths

- Strong algorithmic solutions for bipartite graph and rotated array
- Clear and correct code implementation
- High confidence and decisive communication

Weaknesses

- Incomplete explanation and missing complexity analysis for subsets
- Less clarity in third answer
- Did not discuss edge cases or alternative approaches

Suggestions

- Provide detailed complexity analysis and edge case handling
- Improve clarity and structure in explanations
- Include reasoning for algorithm choices

Summary

The candidate demonstrates solid technical knowledge and confident communication for the first two problems, with correct code and clear reasoning. The third answer shows a correct approach but lacks depth, complexity analysis, and edge case discussion, leading to a moderate overall performance.
