PROJECT EXPERIENCE

Music Genre Classification using ML **Sep 2025 – Present**

- Collaborating in a team of 5 to implement ML models (classification & clustering) on a dataset of 2,000+ music/audio samples, focusing on data preprocessing, model training, and evaluation..
- Developing interactive frontend interfaces using HTML, CSS, and JavaScript to visualize prediction results for 10+ music genres, providing real-time insights for users.
- Designing backend and database systems with 5+ relational tables to manage user data, datasets, and model outputs, ensuring seamless integration of ML models with the frontend.

Carbon Footprint Tracker **Jan 2025 – May 2025**

- Developed a responsive frontend (Login, Register, Profile,etc) using HTML, CSS, and implemented JavaScript functionality by demonstrating interactive UI development.
- Designed SRS documentation and created UML diagrams (Use Case, Class, Activity) for system design.
- Implemented database schema for a 5-member group system, demonstrating relational database design and team data management.

College Management System **Jul 2024 – Dec 2024**

- Built modular software in Java applying OOP principles including inheritance, encapsulation, and polymorphism to ensure scalable and maintainable code.
- Developed modules for managing teachers, schedules, subjects, and login features.
