SORABH BHARDWAJ

Backend Developer — Node.js — Express.js — PostgreSQL

+91 9302599518 | bhardwaj212004sorabh@gmail.com | linkedin.com/in/sorabh-bhardwaj-700a0441b/

Summary

Backend Developer with hands-on experience across **4 full-stack projects**, building on **Node.js**, **Express.js**, and **PostgreSQL**. Solved **450+ Data Structures and Algorithms (DSA)** problems on LeetCode and secured **All India Rank (AIR) 749** in the **Goldman Sachs Engineering Virtual Hiring Challenge 2024**. Maintains a **7.8 CGPA** while completing a Computer Science and Engineering degree, with focus on **JSON Web Token (JWT)** authenticated, **role-based access control (RBAC)** platforms featuring AI-assisted evaluation. Brings solid grounding in relational database design, RESTful API delivery, microservices-oriented backend architecture, and scalable system design.

Technical Skills

Languages:	C++, JavaScript (ES6+), SQL, TypeScript (working knowledge)
Backend & APIs:	Node.js, Express.js, REST APIs, RESTful API Design, JWT Authentication, OAuth (basics), Middleware Design, API Gateway concepts, Rate Limiting, WebSockets, Socket.io, Microservices Architecture, Google Gemini API, Third-Party API Integration
Databases & Data:	PostgreSQL, MySQL, MongoDB, Redis, Relational Database Design, Caching Strategies, Database Normalization, Query Optimization, Indexing, ORM (Sequelize/Prisma), Database Schema Design
DevOps & Tools:	Git, GitHub, Docker, Docker Compose, Postman, Linux/Unix, Logging & Monitoring, CI/CD (GitHub Actions), Nginx (basics), Swagger/OpenAPI Documentation, Environment Configuration
Testing & Quality:	Unit Testing, Jest, Mocha/Chai, Code Review, Debugging, Error Handling, Input Validation
Concepts:	Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), Authentication & Authorization, Database Management Systems (DBMS), Operating Systems, Computer Networks, System Design, Scalable System Architecture, SOLID Principles, Design Patterns, Agile/Scrum Methodology, Role-Based Access Control (RBAC)

Work Experience

Software Engineer Intern | *Coding Club India, Remote* **Apr 2026 – Present**

- Developed **12+** backend features using **Node.js** and **Express.js**, collaborating with a **6**-member distributed team to ship production-ready code across **3 sprint cycles**.
- Optimized **8 PostgreSQL** queries and schema changes, cutting response times by **25%** across **5** key API endpoints.
- Delivered **15** RESTful APIs consumed by a **4**-person frontend team, maintaining consistent request validation and error-handling conventions.
- Resolved **20+** bugs across **10** code review cycles, improving overall code quality scores by **18%**.

Projects

CodeRank – AI-Powered Coding Interview Platform | *Node.js, Express.js, PostgreSQL, JWT, Google Gemini API*

- Engineered an AI-powered coding assessment platform simulating **5** structured interview stages for **100+** candidates.
- Automated pseudocode evaluation via **Google Gemini API** integration, generating AI-assisted performance scores across **3** difficulty tiers.
- Architected RESTful APIs to fetch and analyze **LeetCode** and **Codeforces** profiles, aggregating **10+** competitive programming metrics per candidate.
- Integrated **JWT**-based authentication and role-based access control across **3** distinct user roles, tightening session security platform-wide.

HireFlow – Backend-Driven Job Portal | *Node.js, Express.js, PostgreSQL, Docker*

- Constructed a backend-driven job portal, normalizing **12** relational tables across the database schema.
- Built secure RESTful APIs spanning **20+** endpoints for authentication, company management, job postings, resume uploads, and application workflows.
- Enforced **JWT**-secured, role-based permissioning spanning Candidate, Recruiter, and Administrator roles, cutting authorization errors by **22%**.
- Deployed a Dockerized **PostgreSQL** environment and established reusable middleware, reducing error-handling code duplication by **35%** across **8** service modules.

Twitter Clone – Backend Services | *Node.js, Express.js, PostgreSQL, JWT*

- Designed RESTful backend services covering **6** core modules – authentication, tweets, likes, comments, and follow relationships.
- Established a normalized **PostgreSQL** schema handling many-to-many follower relationships, supporting paginated feeds of **50+** posts per request.
- Streamlined endpoint authorization using **JWT**-based middleware across **15+** routes, restricting edits to each user's own content.

Scalable URL Shortener with Analytics | *Node.js, Express.js, PostgreSQL, Redis*

- Launched a high-throughput URL shortening service supporting **1,000+** requests per second with collision-resistant short-code generation.
- Boosted redirect lookup speed by **40%** through **Redis**-based caching, cutting database load by **30%**.
- Generated analytics endpoints tracking click counts, referrer sources, and geographic/device data across **5,000+** tracked links.

Education

Bachelor of Technology, Computer Science and Engineering **2023 – 2027**
SGSITS, Indore, India | CGPA: **7.8**

Achievements

- Solved **500+ Data Structures and Algorithms (DSA) problems** across LeetCode, CodeChef, HackerRank, InterviewBit, and SPOJ, sharpening algorithmic reasoning and code optimization.
- Secured **All India Rank (AIR) 749** in the **Goldman Sachs Engineering Virtual Hiring Challenge (Hackathon), 2024**.
- Qualified **JEE Mains** with All India Rank (AIR) **34,855**.
