## PROFESSIONAL SUMMARY

Final-year B. Tech Computer Science student with internship experience building **React.js** components and integrating **REST APIs** on a **SaaS** platform. Built web applications with **React.js**, **Node.js**, **Express.js** and **PostgreSQL**, including an **AI-powered** placement assessment platform (system design) and **ExamGrid**, a **TypeScript** exam timetable and seating scheduler with **PDF exports.** Strong foundation in **data structures, algorithms**, **OOP** and **DBMS**. Seeking an entry-level software engineering role.

## TECHNICAL SKILLS

**Languages:** Java, Python, C, JavaScript, SQL, HTML, CSS

**Frameworks & Libraries:** React.js, Node.js, Express.js, Tailwind CSS, REST APIs

**Databases:** PostgreSQL, MongoDB, Supa base

**Tools & Platforms:** Git, GitHub, Linux, VS Code, Figma, Google Colab, Clerk, Inngest, Ollama

**Core CS:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, SDLC, API Integration, Debugging & Testing

## EXPERIENCE

**Software Development Intern** | M9Vends **May 2026 – Aug 2026**

- Designed and developed reusable **React.js** components and interactive dashboards for the company's **SaaS platform**, turning product requirements into working features.
- Integrated **REST APIs** with the front end and debugged issues across multiple application modules to keep behaviour consistent.
- Applied modular design principles to improve the **scalability**, **maintainability** and **consistency** of the codebase.

## PROJECTS

**Placement Simulator** – AI-Powered Assessment Platform **Aug 2025 – Present**

*Tech: React.js, Node.js, REST APIs, MongoDB, Ollama/Groq, Tailwind CSS*

- Built the **React frontend** for the interview chat and coding round, reports and resume analysis. It includes real time answer submission over **Socket.io** with an automatic **REST fallback**, and **JWT refresh-token** handling.
- Developed the resume analysis pipeline: extracted text from PDFs, parsed it into structured skills using the **Groq API** (**LLM**), and matched them against interview scores to generate a **match score** with **verified and unverified skills**.
- Kept **Groq API** usage within **Groq rate limits (8K tokens/min, 200K tokens/day)** by truncating input text, sending condensed per-category summaries instead of full transcripts, and capping output size; added safe fallbacks for truncated or invalid **JSON** responses.

**ExamGrid –** Exam Timetable and Seating Scheduler **Jul 2026 – Present**

*Tech: TypeScript, Next.js, React.js, Tailwind CSS*

- Built the **input layer**: an input manager and default presets that capture department exam data and student cohorts, and pass them to the **scheduling engine** in a structured format.
- Integrated the engine's output into the UI to generate timetables in the required format, with seating and faculty duty views and **PDF exports**.
- Currently testing the scheduling flow **end to end** within Computer Science department.

## EDUCATION

**B. Tech, Computer Science** – SGSITS, Indore (RGPV, Bhopal) **Expected 2027**

CGPA: 7.80

**Class XII (CBSE)** – Central Academy School, Gwalior | 89.80% 2022

**Class X (CBSE)**, K.V. No. 2, Gwalior | 89.60% 2020

## ACHIEVEMENTS & CERTIFICATIONS

- Ranked **AIR 38,496** in JEE Main and appeared in JEE Advanced (2023).
- Qualified **PRMO** and appeared in **RMO (HBCSE-NBHM**), 2019.
- **NPTEL Elite Silver** – Joy of Computing using Python (May 2025); **NPTEL Elite** – Python for Data Science (Apr 2025), IIT Madras.
- Participant: **Nomura Kakushin 10.0** Hackathon (Jul 2026); **Smart India Hackathon**, college level (Sep 2025).
